Classical Finite Transformation Semigroups

An Introduction

The aim of this monograph is to give a self-contained introduction to the modern theory of finite transformation semigroups with a strong emphasis on concrete examples and combinatorial applications. It covers the following topics on the examples of the three classical finite transformation semigroups: transformations and semigroups, ideals and Green's relations, subsemigroups, congruences, endomorphisms, nilpotent subsemigroups, presentations, actions on sets, linear representations, cross-sections and variants. The book contains many exercises and historical comments and is directed first of all to both graduate and postgraduate students looking for an introduction to the theory of transformation semigroups, but also to tutors and researchers.... *more on <http://springer.com/978-1-84800-280-7>*

2009. Approx. 340 p. 4 illus. (Algebra and Applications, Vol. 9) Hardcover

- ▶ **62,95 €**
- ▶ **\$89.95**
- ▶ **SFr. 104.50**
- ▶ **£45.00**

ISBN 978-1-84800-280-7

- ▶ Covers transformation semigroups
- ▶ Presents results from the former Soviet Union semigroup schools
- ▶ Accessible coverage that includes many examples
- ▶ Ideal as an introduction to transformation semigroups and abstract semigroups
- ▶ Includes historical remarks and open questions for further research
