## Comments Report

## Comments:

Please use the space provided for any comments you wish to make which are pertinent to the educational process. These may include all aspects of the course: teaching, examinations, grading, textbook, etc.

- Best math professor I have had at UCLA, very good lecturer and explained things very well.
- Cool course, the instructor thoroughly prepares for the course and actively interacts with the students regarding their concerns and comments.
- Excellent lecturer. Really liked his explanations, best I've seen in the math department so far.
- Great math professor! It's a shame he won't be teaching more. His examples and explanations are effective and he has a funny personality. I always look forward to math with Kozhan.
- He encouraged questions and made himself very available to his students. I would definitely recommend him to a fellow student.
- He is a good and fun teacher.
- He was a fun and good teacher to have. The homework was quite difficult and did not always help us understand what we were doing though. Other than that it was a good course. He was nice to listen to, the grading scale was fair, and the tests were only slightly hard.
- He's a good professor. But he left us with one who isn't very good for the last two lectures
- He's the best math professor I've had so far, although seeing as I had Mess and Handy before, that's not saying much. Still, he was good.
- His teaching is effective and easy to understanding. His exams are interesting and challenging. His review sessions are useful, and the professor is very approachable. Best maths professor ever!
- I am really sad when I heard Prof. Kozhan is leaving UCLA, and this is the last quarter he teaches here. I really enjoy your class! Thank you, Prof. Kozhan!
- I don't understand why Kozhan is leaving UCLA. He is so far the best math professor I ever met. Please, if possible, keep him. All people i know super loves him.
- I wish we had finished all materials before week 10, so that we can have some review time in class. Also, I do wish Prof Kozhan couldve have made to the lectrues until week 10, because this substitutes are horrible. I really wish he was here.
- Kozhan cared about his student. Very good teacher, well structured tests that truly test if students were grasping material. Very fast grader (possibly the best thing)
- Kozhan did a respectable job in teaching the material. However he was not very clear in explaining things, and the fact that he constantly contradicted himself got a bit confusing. Overall not too bad of a teacher though
- Kozhan is amazing in his own knowledge and his teaching techniques. He made everything so understandable and clear, thorough enough.
- Kozhan is by far the best math teacher I've ever had. Helped me so much to do better and learn more in math than I ever have. Thanks for a great quarter!
- Kozhan is great. He seems very amiable and that is something that is greatly appreciated. Sometimes

in the hard sciences professors seem boring or cold, but that's not the case with Kozhan. His teaching style is great; Makes it easy to understand everything. No negatives.

- Kozhan is hands down the best teacher I have ever had. He is simply brilliant. Can't believe he is leaving UCLA...
- Pretty helpful and explains the materials well.
- Professor Kozhan is a really effective professor! Also the podcast helped me a lot
- Professor Kozhan is an extremely intelligent person that knows the material about the course quite well. Though at times he may be a little too advanced for students, he tries to explain everything as best as he can so there are no doubts about the material.
- Professor Kozhan is brilliant and intelligent. He knows how to teach.
- Professor Kozhan is great.
- Professor Kozhan was a great addition to the math department - he was funny, seemed like he was interested in the material he taught us, and was very helpful in answering any of the questions the students had. He was by far my favorite math professor for the year, and really seemed to have a passion for math. He will be greatly missed next year. FIND HIM AND HIRE HIM BACK!
- Professor Kozhan was a great professor. He explained everything clearly and at a good pace. He always stopped and asked if we had questions and took the time to answer them. He answered his email promptly and provided material for us to study for tests.
- Professor Kozhan was one of the best if not the best professor that I had so far in mathematics at UCLA. I wish he could stay longer!
- Professor Kozhan will be missed. He is an amazing lecturer, and he makes math concepts easy to understand. He is extremely thorough covering all grounds before moving on to any other topic even teaching us relative concepts from lower division math courses. I hope he will return to UCLA one day so that we may have the pleasure of his knowledge.
- The instructor knew the subject very well and is a good instructor. I wished he offered more office hours and review sessions.
- The notes on the board was sometimes not very organized, but pretty okay overall. It's nice that the professor gives out practice exams before the midterms and has study guides.
- The presentation and instruction of the material are really effective and clear. The grading can be a little bit too strict. And the podcast is really helpful and it is greatly recorded. High quality enough to be an open course.
- This was a tough class for me because the notes never seemed to help much for the homework assignments. The lectures didn't have any in depth examples like the ones on the homework or exams. Kozhan talks really fast and mumbles sometimes. But he is great at posting grades and material on the webpage quickly. The practice exams and study lists were extremely helpful.
- Very helpful... more competent than our actual teacher.
- straight forward  
provides supplementary material  
easy to follow
- very good professor. like him!
