I really liked Rostyslavs efforts towards giving a good learning experience but I found the material a little bit dull and too focused on exam style problems. I would prefer if the course focused more on theory and conceptual understanding with a larger variety of applications and examples. *Ange ev. nyckelord*

The book is huge but very easy to read

*Ange ev.  
nyckelord*

Not at all good for reading in my opinion but it has a lot of practice tasks and a pretty good solutions manual (if you have the separate pdf)

*Ange ev.  
nyckelord*

This course and GoC 1 needs course literature for the geometry/linear algebra part, Rostyslavs lecture notes and problems were helpful but it's always good to have a book. The course literature for Linear Algebra 2, which we take in the fall, could be useful in GoC 1 & 2. Why not recommend that students buy it for these courses since we need it for Linear Algebra 2 eventually?

### **13: What has been particularly good with this course? .**

Good teacher and good with seminars!

*Ange ev.  
nyckelord*

The homework gave a lot of motivation to keep studying during the course, at the same time it didn't give too much credit, which is great. A maximum of 4 points for the final is good and low enough to not feel like you're not missing out on points if you fail.

*Ange ev.  
nyckelord*

An amazing lecturer!

*Ange ev.

the teacher

*Ange ev.  
nyckelord*

I really like the structure of the lectures it's easy to follow allong even when looking through ones notes afterwards.

*Ange ev.  
nyckelord*

Rostyslav is an amazing lecturer. It's clear that he really likes what he does and it reflects in his lectures. Explains things very well and likes to challenge us to come up with questions. Encouraging us to ask questions is the best in the course for me, people can usually think of clever things to ask and that increases the understanding of the entire class.

*Ange ev.  
nyckelord*

Lectures had a clear structure and the quizzes made it easy to prepare for the exam.

*Ange ev.  
nyckelord*

the quiz was useful to know what was expected from you on each part of the course, and allowed you to go back and repeat if you had to.

*Ange ev.  
nyckelord*

The quizzes helped a lot to work on the course material during the whole semester.

*Ange ev.  
nyckelord*

There was some pressure on the students, this is a good thing regardless of what people say

*Ange ev.  
nyckelord*

Homework and Quizzes. They really do help you keep in touch with the course materials. The second you ignore them though, you're going to have a hard time

*Ange ev.  
nyckelord*

getting back into it.

Rostyslav has been fantastic during this course, the lectures are always interesting and I like the emphasis on questions from the students. You can tell that he puts in a lot of effort and really cares for the students. The quizzes and seminars are examples of this, they are very helpful for figuring out what you don't know early on. The use of the forums has been great as well, it's nice to be able to get quick feedback on things you don't understand.

*Ange ev.  
nyckelord*

It was really noticeable that Rostyslav cared a lot about the students and put in a lot of time to make sure that we did well.

#### **14: Which measures could improve this course? .**

Sometimes the lectures felt a bit rushed, so it was hard to follow. The bonus-point system also struggled in the beginning of the course, but that improved after a while.

*Ange ev.  
nyckelord*

I feel like the seminars are not necessary, I think it would be a whole lot better if we instead have 5-15 minutes each lecture where we solve some problems that are relevant to the lecture. Honestly, I feel like there's too many bonus points to be earned for doing trivial stuff that really shouldn't award anything, like showing up for lectures or asking questions. It would be better if you let someone in the class answer the questions from a student, then award bonus point for good explanation.

*Ange ev.  
nyckelord*

I would have liked to have some kind of large-ish home-assignment with challenging tasks that force students to learn the course material in detail for it to be completed.

*Ange ev.  
nyckelord*

Not much really, was pretty solid. We got every chance to pass the exam

*Ange ev.  
nyckelord*

Can't think of anything

*Ange ev.  
nyckelord*

Studying for the final exam was a bit tricky and I wasn't quite sure where to start

*Ange ev.  
nyckelord*

This course has been very good indeed. The subject is still very hard though, and the more material you have to practice with, the better. For instance, GoA I had a link list with links to math videos on the material. This is super helpful, especially if you miss a class. It would also have been useful to have solutions to previous exams.

*Ange ev.  
nyckelord*

I would like a little bit more emphasis on proofs.

*Ange ev.  
nyckelord*

I think that it would be helpful with a distinction between lectures for presenting the material and lessons where the student may do problems on its own with guidance from the teacher.

*Ange ev.

**16: Thank you very much for your answers to the questions above! You can add further comments below.**

Rostyslav has quickly become one of my favorite teachers ever and I think his teaching technique is great. He can also come with good explanations for our questions (unlike many of our other teachers). *Ange ev. nyckelord*

Very nice course! *Ange ev. nyckelord*

Probably the best structured course so far. I can't emphasize enough how important these little attendance points/best question/fun competition seminars (as well as actually calling out the class for underperforming) is. *Ange ev. nyckelord*

Thank you for your efforts! Very enjoyable course.
