Ros was great!
The course focuses too much on how to apply the mathematics and too little on understanding the theory.

It was much work but for 10hp it was fair.
Less homework than I expected but definitely enough. Quality > quantity.

I guess lessons are the games we had which I haven't really attended because I wanted to study alone, but the few ones I attended was good!
I like the idea of the game very much. It's a bit stressful sometimes but you learn a lot from it and it really makes a big difference in the end.
I learnt very much during the games.

Yes at least the dugga I haven't done the real exam yet!

Ange ev. nyckelord

Dugga, yes Final exam, mostly. Didn't feel like it covered everything we've learned but it would probably be difficult to fit everything into a single exam.

4.4	6 st.	32%
5.5= I really liked it	4 st.	21%

Visa kommentarer

I liked calculus, lots of problems to solve and they explained quite a lot. Would recommend others to buy "Övningar i flerdimensionellanalys" which had better and lots of problem compared to calculus. The litterature for the linear algebra part I didn't like at all though.
Elementary Linear Algebra: Very good. Easy to follow and gives you a lot of information without being overwhelming. Calculus: Some chapters make things more complicated than they have to be but good overall. Works well in combination with the lectures. Very heavy.
the books obsession with maple is just irritating, otherwise good
I don't like having two books. I hardly needed the linear algebra book. Calculus is good!

15:What has been particularly good with this course?

Sök på nyckelord

Antal: 15

Visa fritextsvar

Rostyslav did a very good job explaining on an intuitive level. It is often overlooked by other lecturers, which is sad.	<i>Ange ev. nyckelord</i>
Ros without a doubt!	<i>Ange ev. nyckelord</i>
The lectures, the game, the quizzes, everything. The overall structure of the course makes everything more efficient and easier to follow. I feel like I'e worked less but understood more than in any other course I've taken.	<i>Ange ev. nyckelord</i>
the lectures has been really good and easy to follow, good examples and explanations. The homework was good for practicing the materials from the lectures, by doing does it felt like there were less to "do" to the final exam. The quiz helpt with motivation for the homework and to keep up, same for the tutorials.	<i>Ange ev. nyckelord</i>
The teachers explanations and how educational it was.	<i>Ange ev. nyckelord</i>
Quizzes, tutorials and teacher	<i>Ange ev. nyckelord</i>
The games where great.	<i>Ange ev. nyckelord</i>
The teachers pace	<i>Ange ev. nyckelord</i>
Had a teacher with very much knowledge.	<i>Ange ev. nyckelord</i>
Rostyslav is a good teacher, he can read the class well and knows when people are confused.	<i>Ange ev. nyckelord</i>
The games. And that the teacher was very good at explaining.	<i>Ange ev. nyckelord</i>
Very pedagogical approach. Students opinions were asked a lot, especially of the games.	<i>Ange ev. nyckelord</i>

The system of getting extra points to the exam could be reworked.
More theory and proofs.
-
There were too many games and too many quizzes because there was too little preparation time and I didn't really like the leader and the teacher role the further we got in course. It felt like the leader did everything and the teacher might not have understood the solution anyway. To me, everyone in the team should work just as hard. I also believe that the time we had for the quizzes(15 mins) was too short. I would prefer to have fewer quizzes and that you get more time to do them(25 mins).

I would like to thank Rostyslav for doing the games, the lectures and quizzes.

Ange ev. nyckelord

This course made me a lot more interested in mathematics and made me want to take more courses in math especially differential geometry.

Ange ev. nyckelord

the lectures were great but maybe some more interaction could be added. The group discussions that were added later in the course was good.
